Totals			

Total weight of milk for month: _____
 % Butterfat: _____
 Pounds of Butterfat: _____

Total weight of milk for month: _____
 % Butterfat: _____
 Pounds of Butterfat: _____

* Total pounds of milk multiplied by the percent of butterfat equals pounds of butterfat. Butterfat tests should be done each month. Make a composite sample of total day's milk by mixing a sample from each milking on the day the test is made. Be sure milk is well stirred when sample is taken.

* Total pounds of milk multiplied by the percent of butterfat equals pounds of butterfat. Butterfat tests should be done each month. Make a composite sample of total day's milk by mixing a sample from each milking on the day the test is made. Be sure milk is well stirred when sample is taken.
